Document ID : POL-2021-003
Document Title : API Versioning Policy
Document Type : Policy
Version : 1.2
Status : Active
Effective Date : 15-Feb-2021
Review Date : 15-Feb-2022
Owner : API Gateway Team
Author : Sanjay Bose
Approved By : Rajesh Venkatraman, Service Delivery Manager (NexaTel)
Classification : Internal – NexaTel Managed Services
Last Revised : 12-Jun-2022

REVISION HISTORY

=====

Version	Date	Author	Summary of Changes
1.0	15-Feb-2021	Sanjay Bose	Initial Release
1.2	12-Jun-2022	Sanjay Bose	Clarified deprecation timelines

1. PURPOSE

=====

This policy establishes API versioning standards to maintain compatibility and stability for external partners and internal microservices.

2. SCOPE

=====

Applies to all APIs published by Asterion for NexaTel, specifically targeting all 21 production services.

3. POLICY STATEMENT

=====

3.1 Versioning Scheme

All APIs must use Semantic Versioning (MAJOR.MINOR.PATCH).

3.2 Backward Compatibility

Minor and patch releases must be backward compatible. Major releases may introduce breaking changes.

3.3 URL Pattern

API versioning must be embedded in the URL path: `/api/vN/` where N is the major version.

3.4 Deprecation Timeline

A deprecated API version must remain active for a minimum of 180 days after formal deprecation notification is issued.

4. PROCEDURES

=====

4.1 Version Inception

4.1.1 When breaking changes are required, a new major version must be created.

4.2 Deprecation Notice

4.2.1 Deprecation must include returning the HTTP `Sunset` header in response payloads.

4.2.2 SLA Manager (Priya Subramaniam) must notify all affected partners.

5. ROLES AND RESPONSIBILITIES

=====

- API Gateway SRE Lead (Sanjay Bose): Enforce URL patterns and headers.
- SRE Leads: Manage API versions for their respective services.

6. EXCEPTIONS

=====

Exceptions to the 180-day deprecation period must be approved by Rajesh Venkatraman.

7. COMPLIANCE AND ENFORCEMENT

=====

Non-compliant APIs will not be approved by the CAB.
