Owner : Fraud Operations Team
Author : Ravi Chandrasekaran
Approved By : Rajesh Venkatraman, Service Delivery Manager (NexaTel)
Classification : Internal – NexaTel Managed Services
Last Revised : 18-Sep-2023

REVISION HISTORY

=====

Version	Date	Author	Summary of Changes
1.0	01-Feb-2021	R. Chandrasekaran	Initial Release
2.2	18-Sep-2023	R. Chandrasekaran	Added roaming calibration rules per Storyline

1. PURPOSE

=====

This policy defines fraud rule governance, calibration standards, and escalation thresholds for real-time fraud scoring.

2. SCOPE

=====

Applies to the Fraud Velocity Rule Engine (SVC-FRAUD-001).

3. POLICY STATEMENT

=====

3.1 Rule Calibration Requirements

ALL velocity rules must be calibrated against BOTH domestic AND international roaming traffic samples. Calibration without roaming data is a compliance violation. This requirement was added at v2.2 following the PIR of the fraud velocity rule regression in September 2023 (reference rule FVR-2023-047).

3.2 Escalation Thresholds

- False positive rate > 0.1%: P3 investigation.
- False positive rate > 1%: P2 incident.
- False positive rate > 5%: P1 incident with immediate rule suspension.

3.3 Sanctions Screening

Mandatory screening for all enterprise KYC onboardings against international PEP/sanctions lists.

4. PROCEDURES

=====

4.1 Rule Deployment

4.1.1 Code format: FVR-YYYY-NNN.

4.1.2 Run 48-hour shadow testing before UAT.
