Document Title : Key Rotation Policy
Document Type : Policy
Version : 1.7
Status : Active
Effective Date : 01-Mar-2021
Review Date : 01-Mar-2022
Owner : Security Operations Team
Author : Ravi Chandrasekaran
Approved By : Rajesh Venkatraman, Service Delivery Manager (NexaTel)
Classification : Internal – NexaTel Managed Services
Last Revised : 01-Dec-2022

REVISION HISTORY

=====

Version	Date	Author	Summary of Changes
1.0	01-Mar-2021	R. Chandrasekaran	Initial Release
1.7	01-Dec-2022	R. Chandrasekaran	Added automated renewal requirement per PIR of INC-2022-0089

1. PURPOSE

=====

This policy establishes key and certificate rotation schedules to prevent security breaches due to expired credentials.

2. SCOPE

=====

All certificates, API keys, and database credentials in production.

3. POLICY STATEMENT

=====

3.1 Rotation Schedule

- TLS Certificates: 1 year validity. Renew 30 days before expiry.
- API Keys: Rotate every 90 days.
- Database Passwords: 60 days for tier_0, 90 days for tier_1.
- JWT Keys: Rotate every 30 days.
- SSH Keys: Rotate every 90 days.

3.2 Renewal Alerts

Certificate renewal reminders must be sent at 30 days, 14 days, and 7 days before expiry. Failure to act on a 30-day reminder is a process compliance event requiring a PIR.

3.3 Automation

All TLS certificate renewals must use an automated renewal system (e.g. cert-manager). Manual renewal is prohibited.
