REVISION HISTORY

=====

Version	Date	Author	Summary of Changes
1.0	01-Jan-2021	Anil Sharma	Initial Release
2.5	12-Nov-2023	Anil Sharma	Added specific table tracking rules

1. PURPOSE

=====

Defines administration standards for the core Oracle Database cluster.

2. SCOPE

=====

All database schemas under management, specifically tracking access to PROD_TICKETS, SUPPORT_TICKETS, PROD_SERVICES, and API_SNAPSHOTS.

3. POLICY STATEMENT

=====

3.1 Connection Pool Management

Max active sessions: 1500. SRE tools must monitor connection pool health to avoid exhaustion.

3.2 DDL Lock Control

Online DDL operations must run only in approved maintenance windows.
