Classification : Internal – NexaTel Managed Services
Last Revised : 20-Nov-2023

REVISION HISTORY

=====

Version	Date	Author	Summary of Changes
1.0	15-Jun-2023	Suresh Iyer	Initial Release
1.2	20-Nov-2023	Suresh Iyer	Expanded regex patterns

1. PURPOSE

=====

Expands on POL-2021-018 to define technical prompt validation rules for LLM applications.

2. SCOPE

=====

All LLM integration gateways.

3. POLICY STATEMENT

=====

3.1 Pre-Filter Validation

All prompts must run through a validation layer check. Reject requests containing known adversarial tokens.

3.2 Output Validation

Format constraints must be validated against a JSON schema.
